

Daily Study Plan

B.Tech CSE Graduate · GATE + Software Jobs + Govt Jobs
10:00 AM – 7:00 PM · Alternate Day Structure

GATE

DSA / Coding

Aptitude

Project

Break / Review

Day A · Focus: GATE Core + Aptitude

Time	Session	What to do
10:00–10:15	Warm-up Review	Revise yesterday's notes only — 15 min, no new topics
10:15–12:15	GATE Core — Deep Study	Rotate weekly: OS → DBMS → Algorithms → TOC → CN. Read concept + solve PYQs.
12:15–1:00	Lunch Break	Step away from screen completely. No studying.
1:00–2:30	GATE — Practice & PYQs	Solve 20–25 previous year questions on today's topic. Mark all doubts.
2:30–2:45	Short Break	Walk, water, rest your eyes.
2:45–4:15	Aptitude — Topic-wise	Quant: Number system, %, ratio, time-work. Logical: syllogisms, seating. 1 topic per day.
4:15–4:30	Break	
4:30–6:15	DSA — 1 Problem Set	Arrays / Strings / Linked Lists (Easy–Medium). Solve 2+ problems. Understand, don't just copy.
6:15–7:00	End-of-Day Notes	Write 5 key points from today. Mark what to revisit. Log in notebook or Notion.

Day B · Focus: DSA Deep Dive + Project

Time	Session	What to do
10:00–10:15	Warm-up Review	Skim yesterday's GATE notes — 15 min only.
10:15–12:30	DSA — Structured Practice	Roadmap: Arrays → Recursion → Sorting → Trees → Graphs. Solve 3–5 LeetCode Easy/Medium.
12:30–1:15	Lunch Break	Full break. Step away from screen.
1:15–2:30	Aptitude — Timed Mock	20-question timed test (25 min). Analyse wrong answers for 30 min. Builds NQT + govt readiness.
2:30–2:45	Break	
2:45–5:45	Project Work	3 hours uninterrupted. Build a real, deployable web project. Connects directly to job portfolio.

Time	Session	What to do
5:45–6:15	GATE — 1 Short Topic	Read one small GATE concept (e.g. one page of OS or CN). Keep GATE warm even on B days.
6:15–7:00	End-of-Day Log	What did I build today? What DSA pattern did I learn? Log it.

Weekly Rhythm · Alternate A and B Days

Time	Session	What to do
Monday	Day A	GATE: OS / Algorithms · Aptitude: Quantitative topic
Tuesday	Day B	DSA: Arrays / Strings · Project: Start or continue feature
Wednesday	Day A	GATE: DBMS · Aptitude: Logical Reasoning
Thursday	Day B	DSA: Recursion / Sorting · Project: Continue building
Friday	Day A	GATE: TOC / CN · Aptitude: Full mock test
Saturday	Full Mock + Revision	Morning: GATE mock (2 hr). Afternoon: DSA contest or LeetCode. Evening: weak area fix.
Sunday	Light Day + Planning	Revise week's notes (1.5 hr). Plan next week. Rest — consistency needs recovery.

Job Applications & Take-Home Assignments

Situation	What to do
Deadline 3+ days away	Don't panic on Day 1. Read the assignment carefully, plan what to build, then use the Project block (2:45–5:45) on Day B. Keep GATE and DSA blocks running normally.
Deadline in 2 days or less	Flex day — pause the Day A/B structure. Dedicate 10:00 AM–5:00 PM to the assignment. Keep 5:45–7:00 PM for GATE revision so you don't go completely cold.
Weekly job applications	Every Sunday, spend 30 minutes applying to companies. Keep your resume updated. Batch-apply once a week — don't let daily job scrolling kill your study momentum.

Key Rules & Insights

GATE multiplier: Every topic you study for GATE (OS, DBMS, Algorithms) also helps in software jobs and govt exams. GATE study is never wasted — it multiplies across all three goals simultaneously.

SC Category advantage: Your GATE cutoff for IIT/NIT is significantly lower than general category. A score of 35–45 can realistically get you into a good NIT. Your 19 marks shows the basics are there — you just need structured coverage.

Project work = assignment readiness: Your daily 3-hour project block on Day B means you are always ready for take-home web dev assignments. When a company sends a task, you'll finish it in half the time others take.

Start today — 3 actions

- 1 Get a notebook and log what you study each day. This alone will double your consistency.
- 2 Pick OS as your first GATE subject — high weightage and directly useful in software jobs.
- 3 Do 2 LeetCode Easy problems tonight to build the DSA habit from day one.

Consistency beats intensity. One focused hour every day beats ten scattered hours once a week.
